Tristão da Cunha.

Drague autoporteuse à élinges traînantes

Capacité du puits	3 500 m ³
Port en lourd	5 500 t
Longueur hors tout	89,3 m
Largeur	22 m
Tirant d'eau à pleine charge	5,7 m
Profondeur de dragage maximum	27,6 m
Diamètre du tuyau d'aspiration	800 mm
Pompes (d'aspiration)	1 250 kW
Pompes (refoulement à terre)	3 000 kW
Propulsion	2 x 1 100 kW
Puissance diesel totale installée	5 510 kW
Vitesse	11,3 kn
Équipage	16
Construite en	2019

ULEV

ULTRA-LOW EMISSION

With our 'newbuild' vessels, we have decided to take a new greener approach: new vessels will be fitted with a state-of-the-art filter system. A filter system that processes exhaust gases and prevents nanoparticle emissions. Our Ultra-Low Emission vessels are recognizable by the blue funnel
